Hobbies

I love cooking, it's been a passion of mine for most of my life. Before I started working in web development, I worked as a professional cook / sous chef for about 10 years. Cooking is still, and will always be, a passion of mine. I actually believe a lot of what I learned working in professional kitchens over the years, both on the East Coast and the West Coast, have helped me with web development.

My attention to detail, desire to create consistently flawless designs, and exceeding the need of the client were honed during my time in the kitchen, and overflows into my current role as a frontend web developer.

Additional information
